

“I love to make a difference by providing the compassionate, high-quality care that seniors need.”

About Natalia Ferrer Bravo, MD

Since Dr. Natalia Ferrer Bravo was a little girl, she’s wanted to help her community and improve healthcare. This desire led her to become a board-certified internal medicine physician who focuses on addressing health concerns, emphasizing preventive care, and building strong relationships. “I love to make a difference by providing the compassionate, high-quality care that seniors need,” Dr. Ferrer Bravo says. “There’s nothing more rewarding than seeing their quality of life improve.”

To stay up to date with medical research, Dr. Ferrer Bravo frequently reads journal articles. She also enjoys running, walking, spending quality time with her husband and son, and the idea of visiting Australia one day.
