

“I strongly believe in social justice and health equity with uncompromising ethics.”

About Kostiya K. Peki, MD, MPH, MCSO

Dr. Kostiya Peki experienced a failed healthcare system while growing up in Africa, and it inspired him to advocate for underserved patients. “I strongly believe in social justice and health equity with uncompromising ethics,” says Dr. Peki, who’s board certified in internal medicine. “I was also raised to value seniors, and I’m dedicated to helping improve their quality of life with the dignity and respect they deserve.”

In addition to providing care, Dr. Peki has led healthcare networks in the U.S. and other countries as well as humanitarian missions. During his down time, he likes to expand and share his medical knowledge, spend time with family and friends, play ultimate frisbee and chess, read, and watch shows.
