

“When we take great care of our seniors, that echoes down to their children, grandchildren, and great-grandchildren.”

About David Barr, MD

Dr. David Barr is a physician who strives to treat all patients like a member of his family. He learned the importance of this from his own father’s struggles with chronic illness. “When we take great care of our seniors, that echoes down to their children, grandchildren, and great-grandchildren,” Dr. Barr says. “Keeping seniors healthy allows them to keep active and keep doing great things for their families and communities.” Above all, Dr. Barr wants all patients to feel they have an ally in their medical struggles, big or small.

When he’s not partnering with patients, Dr. Barr is constantly reading to expand his medical knowledge. He also loves to spend time with his wife and daughter, play games and watch movies with them, and play the piano.
