

“Every patient is unique and if you take the time to listen, you will find a human being and not a patient.”

About Andrew Santos, MD

Dr. Andrew Santos says he has “always had a passion for science and caring for people in need.” He explains, “Every patient is unique and if you take the time to listen, you will find a human being and not a patient.” He is grateful to have the opportunity to make a difference in the lives of his senior patients. “I love treating the elderly because each of them has a story or experience we can learn from,” he says. He often reads medical journals and participates in Continuing Medical Education opportunities to stay up to date with the latest medical advancements.

When Dr. Santos is not caring for patients, he enjoys staying active by golfing, hiking, and playing soccer. He also likes listening to live music and traveling.
