

**“My main goal in healthcare is to keep my patients healthy, happy, and at home.”**

#### **About Ken Bryner, MSN, CNP**

Interacting with and educating patients is Ken Bryner’s favorite part of his profession. He feels a “great deal of pride” caring for the senior population. “Patient empowerment is the best thing you can provide to an elderly patient that feels like they have lost all sense of control with everything around them,” he says. He likes including patients in developing their treatment plans and believes it is “very important to honor the patient’s wishes.” He adds, “My main goal in healthcare is to keep my patients healthy, happy, and at home.” He also specializes in Nephrology, Dialysis, and Dementia Care.

Ken Bryner loves spending his free time with his wife and rescue dog. He also enjoys camping, bowling, and riding his HD trike.
