

“My hope as a doctor is to have a positive, lasting impact on the lives of the people I care for.”

About Prakash Arumugam, MD, PhD

“Meeting patients, hearing their stories, and seeing the profound impact” while volunteering at a Helping Hands Free Clinic inspired Dr. Prakash Arumugam to pursue a career in medicine. He carefully listens to patients to address their concerns and foster trusting relationships. “I make an effort to learn their stories and understand their struggles,” he says. He always considers his patients’ preferences when developing treatment plans. “My hope as a doctor is to have a positive, lasting impact on the lives of the people I care for,” he says.

Dr. Arumugam’s favorite way to spend his free time is with his family. He loves basketball and even coaches a kindergarten team. He also enjoys hiking and reading science fiction books.
