“I am convinced that most illnesses are preventable and that physicians can be human, respectful, caring and empathetic while still providing excellent care.”

About Chad Hines, MBBS, MPH

In medical school, Dr. Chad Hines saw that older patients often received care that was an extrapolation of adult medicine; this frequently led to poor outcomes. He has since realized seniors need specialized, holistic care comprised of love and dignity.

“I am convinced that most illnesses are preventable and that physicians can be human, respectful, caring and empathetic while still providing excellent care,” says Dr. Hines. “It is a privilege to walk side by side with patients and their families as they try to have more healthy days.”

Dr. Hines and his wife have a daughter. He likes to spend time with his family and friends. He also enjoys jogging, swimming and playing basketball.
