“I truly care about patients as individuals […] I want each patient to have the best possible health and quality of life.”

About Shelah Celestin, D.O.

Dr. Shelah Celestin was inspired by her grandmother, who was a home health aid, to pursue a career in medicine. “Being able to witness her in a healthcare role at such a young age ultimately made me want to be like her and serve my community through medicine as well […] I want to be the type of physician I wish she had,” she explains. She views her relationship with patients as a “partnership” and prioritizes prevention. “Respect and cultural appreciation” are at the forefront of her practice. “I truly care about patients as individuals […] I want each patient to have the best possible health and quality of life,” she says.

In her free time, Dr. Celestin loves watching women’s basketball, reading, and spending time with family.
