**“I want patients to know that I value our time and want them to feel they are receiving the best care.”**

### About Debra Budge-Brennan, MSN, FNP, CRNP-BC

Debra “Debbie” Budge-Brennan chose to pursue a career in healthcare to help people in her community. “I want patients to know that I value our time and want them to feel they are receiving the best care,” she says. Respect and active listening are foundational in her practice. She enjoys getting to know patients and their families, as well as anyone else who is important in her patients’ lives. “Knowing them as a person, an individual, not just as an illness, makes visits more pleasant for the patient and establishes trust between me, as the provider, and the patient,” she explains.

When not with patients, Debbie can be found enjoying the beach with family, supporting her daughter at cheerleading competitions, or making jewelry.
