

“Their wisdom, life experiences, and resilience motivated me to choose a career where I can care for and advocate for them.”

About Sally Azzo, MD

Dr. Sally Azzo has always felt a deep and meaningful connection with older adults. "Their wisdom, life experiences, and resilience motivated me to choose a career where I can care for and advocate for them," she says. She builds strong bonds with her patients through compassion, patience, and genuine listening — creating an environment where every patient feels respected, safe, and understood. For Dr. Azzo, it's often the small things that make the biggest difference — remembering personal details, encouraging independence, or simply spending extra time with a patient to improve their quality of life and emotional well-being.

Fluent in English, Arabic, and Chaldean, Dr. Azzo can connect with and serve a richly diverse patient population, ensuring every patient feels comfortable and truly cared for.

When not with patients, Dr. Azzo enjoys spending time with family and friends, working out, and exploring new places.
