“When we work together on our shared goal of improving your health, I will always be honest and will work diligently on your behalf.”

About Robert Donovan, MD

Dr. Robert "Rob" Donovan was inspired to pursue medicine by watching his mother dedicate herself to nursing and to the science of patient care. "Her dedication to patient care and to learning the science of medicine was an inspiration for me," he says. Growing up in a working-class family, Rob developed a deep appreciation for hard work and authenticity — values that guide his practice every day.

Dr. Donovan believes that honesty and authenticity are the keys to building a trustworthy therapeutic relationship. He sees himself as his patients' biggest advocate, helping them navigate the complexities of medical care. "Making decisions about one's own health is not only related to being knowledgeable but also takes into account our own goals and values," he says. His commitment to his patients is straightforward and unwavering. "When we work together on our shared goal of improving your health, I will always be honest and will work diligently on your behalf," he says.

When not with patients, Rob's greatest joy is spending time with his two young sons — the light of his life.
